

Anti-Bullying and Cyber-Intimidation Programs

Educator Awareness and Prevention Program Overview

Bullying, harassment, and cyber-intimidation are real issues that can dramatically affect today's schools. More bullying cases have parents turning to the courts to hold schools more accountable. What proactive steps are you taking, and how can you mitigate your district's risk?

This program is helping educators better address these critical issues by providing access to online educational videos and staff development courses that allow educators to better teach students and parents how to recognize, address, and prevent these issues. Schools are finding this program to be an ideal supplement to enhance existing anti-bullying programs and initiatives.

Over 30% of kids in the U.S. have been bullied and over 40% have been cyber-bullied.
